About This Content

Put your piloting skills to the test over the Pyrenees with the highly popular Discover Europe flight plans from First Class Simulations.

Following your tour around Europe affords the opportunity to visit Paris, Rome, Madrid, Venice, Prague, Warsaw, Vienna, and a whole host of countries and cities that reflect the multicultural tapestry of the continent.

With a range of flights for both novice and seasoned aviators the developers hope that there is something for everyone, from challenging approaches to a leisurely Mediterranean descent into the playground resorts of the rich and famous.

Also included in the package is a detailed rendition of the Piper Pacer, carefully crafted to be the ideal accompaniment to the journey. Offering both manoeuvrability and benign handling characteristics, the Pacer is a stable platform that is particularly well suited to the role of a sightseeing aircraft.

The adventure is supported by lavish extras including a tourist's guide to all the destinations visited, detailed pilot's notes, a comprehensive briefing and a tutorial for the included Piper aircraft.

This DLC would not install on two machines running FSX Steam Addition.

To date technical support has been unable to fix this issue and now they have not responded to my last 3 e-mails.

A defective DLC with lousy tech support. Do not buy!!!!. nice flight plans, just load one and fly around :)

the Piper Pacer is also very nice.. This does not load into fsx. The steam page I'm on states the addon is in my library but the store page shows only in the cart. I would appreciate a fix for this.

Until then I cannot recommend this addon.

After working with this a while I discovered it loaded into "saved" . You have to 'load" it each time.

It is a bit of a let down though. Not much quality. You get what you pay for.. **THIS PIPER IS GREAT AND THE FLIGHT ARE FUN.** This addon is very nice in terms for those "free-flighters" :)

Wanted to fly over major destinations over Europe and get to know the beautiful sights?

Go captain!. I really like it. Yes it's "only" flight plans but with the excellent documentation (although a bit hidden) it really shines, the Piper Pacer is fun and nimble (it's showing its age a bit but it doesn't detract) a big thumbs up for this great little dlc.
