About This Game

On July 2nd, 2009, every living thing vanished. Gone, without a trace.

I'm a hobbyist who makes games for fun. You can finish it in 10 minutes. If you play it, I'll be thankful.

Description of gameplay

The gameplay is a walking simulator. The game uses first person controls. Walk using w, a, s, d and jump with space. As you explore the world, the narrator will reveal details about who you are, what happened.

Features:

- * Full voice acting
- * Short - you can finish the entire game in around 10 minutes
- * Story rich - a mystery with several major plot twists
- * Simple controls - walking simulator controls with minor, simple platforming sequences

I wanted to make a game about the stories we tell ourselves to rationalize the choices we make that often don't make sense to people looking on the outside.
